

Case Study: Inspection Enclosure

Project: Inspection Enclosure

Contractor: A tier one automotive parts supplier

Project Brief: To design and manufacture an inspection enclosure to improve a loading deck.

Our client, a tier one automotive parts supplier, contacted us to improve a loading deck with an enclosure, climate controlled air replacement and inspection quality LED lighting.

This was required to reduce dirt contamination and improve overall product quality.

The project was installed in a tight time frame with a very short lead time and has surpassed the quality improvement expectations.

Facility comprising of:

- Inspection Enclosure
- Climate Control
- Clean Environment

Plant Features:

- Air Replacement Plant
- Ceiling Diffusers
- Inspection Quality LED lighting
- Anti Fatigue flooring
